At Wires and Phones we believe business communications don't need to be complicated or expensive. That's why we partnered with Voice-Ring, who built an enterprise-grade phone solution for small to mid-size businesses. All you need are the phones. Our service comes loaded with over 50+ standard features including disaster failover, plus it has the unique ability to 'share' lines saving you up to 50% each month. If you are a business that needs from 2 up to 2000 phones at one location or across the country, you can buy or rent as many phones as you need now, and know that we will grow with you over time.

Save hundreds of dollars in up-front equipment costs. Access top-of-the-line business-class functionality with over 50 built-in features. **Better yet, you have a choice to pay for phones up front or pay a small monthly fee, requires no upfront equipment payments.**

Best yet, unlike our competitors who will ship you a box of phones and wish you luck, all of our installations are performed by local, experienced technicians. You always have access to a local expert.

Voice-Ring technology utilizes the same technology as all other cloud based services. (Web Site, E-Mail, File Storage, Backup, TV and Cellular Service). The business argument, including disaster recovery, is the same for all of these technologies.

Buy Only What You Need. Purchase only the number of phones you need now, and purchase more (desk or cordless phones with paging at any one location, or utilize your cell phone as a desk phone) as you need them. Purchase as few as one at a time.

Buy with Confidence. For more than 25 years, we've served businesses in the U.K. and the U.S.A

Wires and Phones
Your Authorized
Service Provider
386-951-4109

Expands with Your Business. It's easy to increase the number of people you support with us. Buy as few as 1, 2 or 3 phones now, and buy additional phones later, as your business grows! YOU choose how many lines and phones you want. What's more, we'll provide the same easy installment purchase plan for your additional phones.

Keep Your Current Number. Keep your existing phone number(s) and "port" or transfer them to your new VoIP phone service. It's as simple as filling out a piece of paper.

Configuration

The VoIP Cloud Based Phone Service uses the internet to receive and deliver your phone calls. The system is flexible allowing for multiple ways to connect your phones as shown in this diagram.

Porting Your Current Number

VoIP allows you to keep your existing phone numbers and “port” or transfer them to your new phone service.

Disaster Recovery

VoIP by design will answer calls and route calls to users, even when you do not have power or internet. Callers will not know that you are down, and suspect you may be out of business.

About Your Company

We provide hosted VoIP services for the business market worldwide. The company’s turnkey business phone service is easy to implement, cost effective, and delivers a complete range of powerful features.

SPECIAL “Free Network Assessment”

Be sure your network can support VoIP before you order.
